Bilateral Meetings

- May 22, 11:30 - 12:30
- May 22, 13:30 - 17:30

Description

As a innovative company, COX 4 ltd combines passion for technology with knowledge and experience, in order to meet specific needs of our clients. We share our resources, both within our team, our clients and partners, and the community, in order to promote change and flexibility.

A team of enthusiastic and motivated young individuals, turn obstacles into challenges, from which we all grow independently and as a company, and we take our clients with us. That is what sets us apart.

At the beginning, there was a small team with big dreams. Now we grew into a bigger family, that already set great results and accomplishments. We've experienced success since the early college years: from Microsoft Imagine Cup, where we won the People's Choice award, over to regional competitions.

Parallel to those successes, some of us were and still are building innovative eco systems in the IT community of Herzegovina. Now we're using that experience to push those ideas to young talents, and change mindsets within both the community and our company.

As a result of hard work, dedication, innovation and experience, from the very beginning we've satisfied all our customers needs; starting from domestic as well as international clients.

This is because our clients needs come first. We listen, we process, we deliver.
