Bilateral Meetings

- May 22, 13:30 - 17:30

Description
Founded in 2006 in Tirana, ikubINFO provides services for software development by using the most modern technologies. The company offers its services mainly to the public sector, but also to banking and financial, telecommunications and energy sectors.

With more than 50 developers, equipped with high knowledge and experience in various fields, ikubINFO stands as the largest company in Albania in the field of software development. Based on its mission, vision and values, ikubINFO thrives to strengthen its position as a leader in Albania, but also to expand its activities abroad. That is why we are looking to find opportunities and interested partners to cooperate in outsourcing.

Our main areas of expertise are: Software Engineering, Application Development for Desktop, Web, and Mobile, Migration and Integration Projects, GIS Application, Software Maintenance and Testing, Help Desk, and IT Consulting.
