Bilateral Meetings

- May 22, 13:30 - 17:30

Description

Algonator build Machine Learning algorithms and help organizations transform their data into knowledge as a tool of efficient intelligence. Together with us you can use all the power of data by using Machine Learning algorithms. In that way you will develop interesting and innovative solutions that will give additional value to your company and it will distance you from the competition. Our goal is to strengthen small and medium-sized companies and provide them with the possibility to use the power of Machine Learning algorithms.
