

META SOFTWARE SOLUTIONS

Who we are

“Meta Software Solutions” (MSS) is a young, but with great ambitions to become a huge company. As a company we officially exist from September of 2014, when we decided to establish software company after almost six month of work as a start up team in business incubator of “INTERA Technology Park” in Mostar.

MSS is the result of plenty rebellious ideas, tightly coupled within the IT sector, combined with the passion and courage for a brighter future. A future where IT has the main role and we as the potency to defy it.

Main goal of MSS is the establishment of a powerful and sustainable company which can, at any time, answer on all modern IT demands. With that in mind, we are working on various own products and services.

At the moment, our main occupation is development of various kind of software services for all known platforms such as: web, mobile and desktop.

So, MSS development team can offer services of developing modern, reliable, and security stabile apps for third-parties, no matter if you are person or company.

Vision - Establish company where: workers like their job, clients are not thinking about other options except us, and where partners want to deepen cooperation.

Principles - MSS success lies in 5 main principles which are all equally important for us:

- Only “socially responsible” company is sustainable company.
 - Communication and negotiation before technology
 - Well done job is job which satisfy all client needs
 - Develop partners, not competition relations
 - People are always on first place
- 

Clients and partners

We deeply believe that success of any young company lies in their ability to build partnership with potential competitors and to satisfy as much as possible client needs. Working on this way we are building “win-win situation” whenever it is possible.

Below, we proudly present our main clients and partners.

Testimonials

MSS believe that business success is pretty easier when you know how to listen others. It is highly important for us to get feedback after every common work with some of our clients and/or partners. These are some of our favorites testimonials which are motivate us to keep good work.

“

We believe in caring and encouraging the growth of partnerships, because they can provide great value for both customers and business. This is where we found common ground with Meta Software Solutions. As we provided our services for BEST Mostar (Board of European Students of Technology) Mostar, in cooperation with MSS, on a project called "Mobilize your future today", MSS impressed us with their understanding, efficient and professional manner.

Samir Šupčić, CEO at COX4 d.o.o

”

“

Even if they are on the beginning of their surely success business story, MSS team were demonstrated their skills and professionalism in very short deadline, but at the same time they offered us solutions which were overmach all our expectations

INTERA TP - executive director, Mladen Kostić

”

“

I have been extremely impressed by how customer oriented and efficient MSS has been. Throughout the project they ave worked relentlessly to ensure that the outcome was exactly what we wanted. We will undoubtedly continue to resort to them in the future. When it comes to software, you can't go wrong with MSS.

Wawe Application” - CTO, Pablo Clemente

”

“

The collaboration with MSS improved some processes in our company. The young team is very customer oriented and constantly strive common solutions for each process to find and develop. Projects from our company has been understood very quickly and in shortest time we had solutions. In-process collaboration, the work was very pleasant and all issues were resolved. Space for new thinking and innovative ideas were in whole process available We recommend MSS with any questions regarding software solutions for large and small companies.

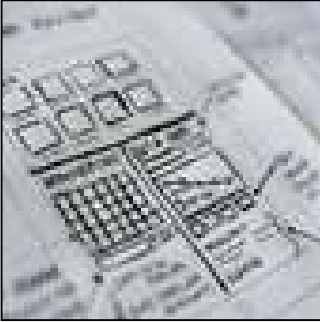

Danijal Jelovac, CEO at Insolvenzwaren-net

	E-business	<p>E-business solutions</p> <ul style="list-style-type: none">• we analyse your software support for business processes• we offer you unique software solution• we create you Online shops, human resources modules, project management modules, etc...
	Presentation	<p>Corporate presentation</p> <ul style="list-style-type: none">• we analyse your business problems• we offer you various software solutions• we create you web site• we design visual identity

Technologies which we use

Our team consists of passionate lovers of technology what makes us so attractive for collaboration with individuals, but companies also. List below illustrate technologies which we usually use while working our projects and true level of our skills which we are trying to improve from day by day.

ASP.NET Web Forms & ASP.NET MVC

Azure

jQuery

How to collaborate with MSS

MSS team is highly convinced that majority of fails in software projects became just because lack of communication between clients and software companies. As we think that technologies were never barrier, we invested really a lot in project methodologies in order to satisfy all client needs. In the illustration below you can find out how it looks when you collaborate with u

For us, client initiative can be phone call, email request, etc... This is enough good reason to arrange meeting with potential client where we will discuss about software requirements.

It is important to emphasize that we are not talking about details during first meeting. That is the time where we try to collect as much as possible clear picture of future software requirements.

After these meetings, our project managers are planning the project, dividing it into small iterative phases (sprints) and create the initial offer.

This point represents a crucial part of the whole collaboration process. It's not a problem for the energetic MSS team to repeat it as much as needed.

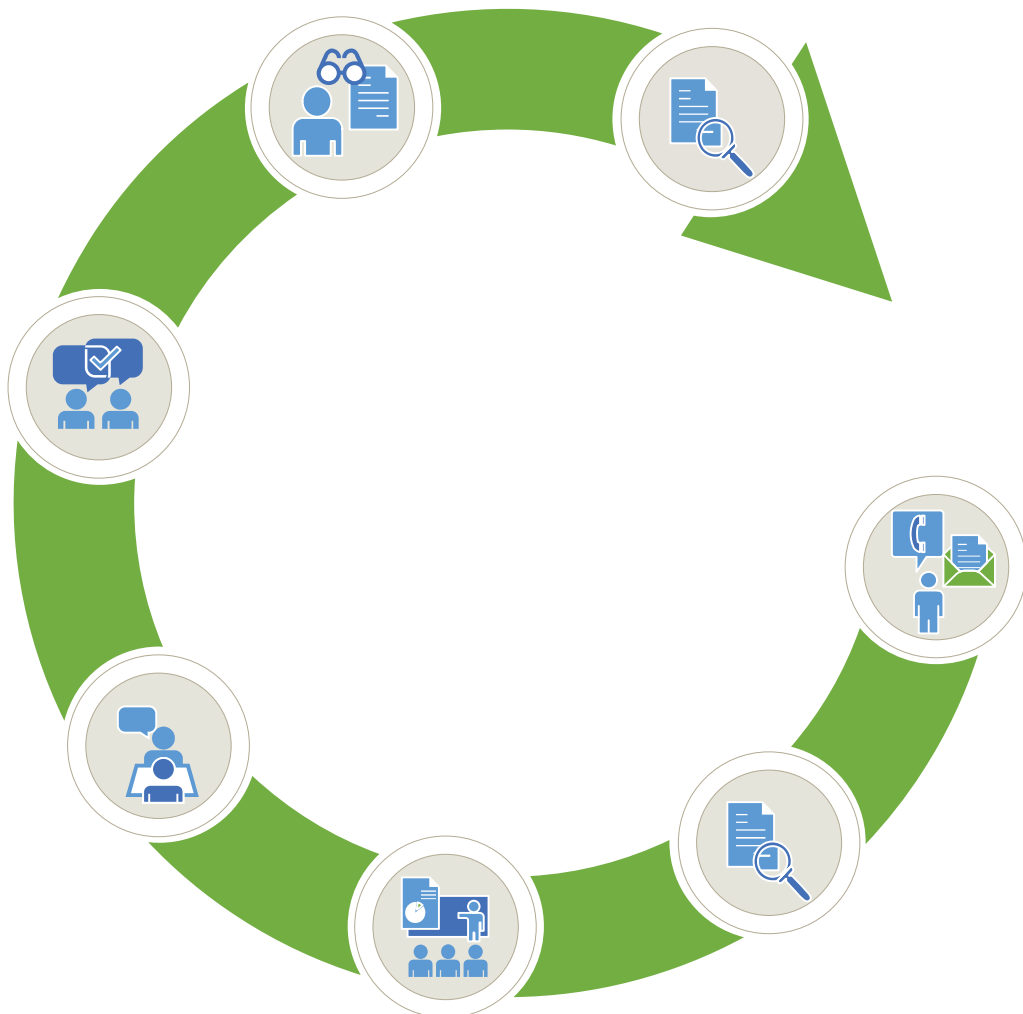

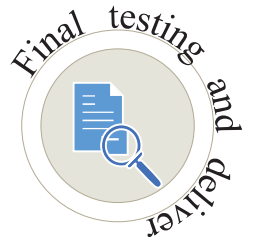

After all parties are satisfied, and after the contract is signed, it is time for our team to start with the software development.

How to collaborate with MSS

We prefer to arrange meetings after every iteration/milestone where we together review previous work and where we gather feedback from our clients. Also this is a great way to keep the client involved during the whole development process.

After last iterative process it's time for software delivery, ayment and what is the most appreciated for us, client evaluation of our work.

Our team

MSS is established with greatest dream. Our greatest dream is to build business environment where people like to work and where people invest the best of their potentials in order to success.

Almir Dodigović
COO, Project management and expert for
Front-end development

Adnan Nametak
Graphic design and Front-end development

Haris Hadžiahmetović
CEO, Project management and expert for
Back-end development

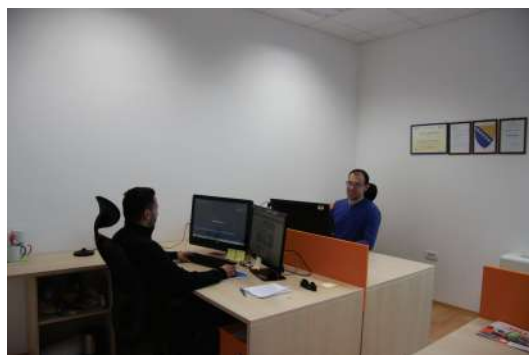

Ajdin Salčinović
Front-end development

Our working environment

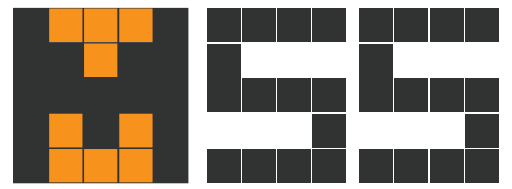

Even if we are small and young company, we are investing most of our efforts in working environment. For us, working environment doesn't mean just place, computers, clean and fresh offices, etc (but, it doesn't mean that it is not important for us). Beside of all of these facts we constantly trying to keep motivation of all of our employees on extremely-high level.

So, we truly believe teamwork values which is the reason why we emphasize all of these.
